Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

I wish to express my opposition to LightSquared's request to affirm its license and its request to go forward with its plan. There are reports of an independent test that indicate that LightSquared's technology interferes with high precision GPS technology. This will have a very detrimental effect on survey companies and the construction industry that rely on GPS technology. These companies have spent tens of thousands of dollars on GPS technology and rely on it for every day operations. If LightSquared moves forward GPS technology could be rendered useless. I request that LightSquared's request be denied until testing proves that the technology will not interfere with existing GPS technology. Thank you for your attention to this matter.

Sincerely,

Dennis A. Kraus Jr.
Dearborn County Surveyor
